

NOTICE TO TENANTS

PEST CONTROL TREATMENT

Your unit will be treated on _____ between _____ AND _____ O' CLOCK
Roaches Ants Rodents Other

In preparation for the service, please do the following:

1. **CLEAN** ALL KITCHEN SURFACES, including cabinets, countertop and floor. A strong bleach based cleaner is very good practice.
2. **MAKE SURE ALL CONTENTS** in the cabinets are organized and cleaned up. If it is organized and not cluttered, it does **NOT NEED TO BE REMOVED**. Clear off top of refrigerator so we can open up.
3. **CLEAN UNDER AND BEHIND THE REFRIGERATOR** and **STOVE!!**
4. **PET FOOD MUST BE COVERED** and **STORED IN SEALED BAGS**.
5. **NO FOOD OR EATING MATERIALS SHOULD BE EXPOSED**.
6. **EMPTY YOUR TRASH CANS**
7. Report to us **ANY allergies or sensitivities**
8. **ALWAYS CLEAN ALL DISHES AND SILVERWARE BEFORE USE**.

Treatment Description:

- This is both a pesticide treatment and a bait application.
- The service technician will apply a residual liquid insecticide formulation to the cracks, crevices and baseboards of the entire residence. He will likely open many of the cabinets and closet doors.
- You may continue to see insect activity for several days after treatment. This is normal, as our materials are designed to flush them out of hiding places.
- Be sure to report to management if you continue to see activity, so we set up a return treatment.
- You are invited to look at our web site for more information about the pesticides and techniques we use:
